

Curriculum Night

Wednesday August 26, 2015 5:30pm-8:00pm

In your child's classroom

What is it like to be a student at San Tan Charter School?

Please join our faculty as they provide an overview of the differentiated teaching methods, cross-curricular focus, and variety of learning opportunities your child experiences. Our teachers are thrilled to share everything from differentiated math and reading groups, to developmentally appropriate spelling words, using play to enhance math fact skills, as well as leveled homework. You choose from three different presentation times that works for your family. At the end of the presentation you will be given your child's beginning of the year assessment data. Our hope is that you will not only have a clear understanding of the academics that are covered at STCS but you leave feeling the passion and dedication our teachers have for educating the children of San Tan Charter School.
