

Gifted Parent Night at San Tan Presents Dr. Paul Beljan

— November 15th, 2016

Presentation 6 to 7pm, Q&A Session 7 to 7:30 pm

Why Does My Gifted Child Do That?

In this presentation, Dr. Paul Beljan, a Neuropsychologist and expert in evaluating and understanding gifted children and their common misdiagnoses, will provide neurological insight towards why our gifted children do the crazy things they do.

Dr. Paul Beljan is a co-author of the book: Misdiagnosis and Dual Diagnosis of Gifted Children and Adults and the soon to be released Large Scale Brain Systems and Neuropsychological Assessment.

Beljan Psychological Services draws patients from around the United States and internationally. Dr. Beljan has taught gifted education and pediatric neuropsychology at the master's and doctoral levels. He lectures nationally on numerous topics associated with giftedness and pediatric neuropsychology. Dr. Beljan is a nationally renowned expert in forensic neuropsychology within the civil, and juvenile and criminal justice levels. His current professional interests are in psychopharmacology and developing an integrative clinic style of private practice that offers families comprehensive psychological services and neurocognitive intervention using the Motor Cognition2 program developed at Beljan Psychological Services.
