

LOOK WHO CAME TO VISIT!!! This week for our in-house field trip we got to see some awesome reptiles; Lizard, snakes and a tortoise! We learn about them and we also got to pet the friendly reptiles.

Greetings Bear Cub Families!

Week of June 22TH – June 26th

Hello! In this week's lessons plan our littles bears are building their shape vocabulary, by understanding using words like "square," "circle," "triangle," "side," "corner," "curved," "straight." To help them understand the differences between shapes, help them count sides and corners.

We also learn the difference between a two dimensional and a three-dimensional shape.

Looking forward to another fun week.

Mrs. Smith
