

Greetings Bear Cub Families!

Week of June 25th – June 27th

Before this week's lessons plan we introduced our Little Bears to Primary and Secondary Colors. We read the big book of colors, the cover is beautiful, bright, and attractive and immediately grabbed our cub's attention.

Our science experiment involved letting our Little Bears explore fun colors, and teaching them how to mix Primary Colors to create new colors. By using water, milk and food coloring dye. The little bears were so excited to see Primary Color change to Secondary Colors.

Yellow + Red = orange, Red + Blue = purple, Blue + Yellow = green

LITTLE BEARS DANCE TO MUSIC! This week for our in-house field trip we had Musical! She read us a story from her adventure in her island of Motunui, and also taught us how to do her famous dance steps, "How far I'll go".

Looking forward to another fun week.

Mrs. Smith
